IN the Fifth Column of t
Almanack, you have t
Age of the *Moon* standing
gainst every day in the Ye
by help whereof and this
tle *Table*, you may nearly
I. At what hour and min
the moon will be just
the South, either even
or morning.
II. How many hours and
nutes she will *shine*, eit
at night or next morni
III. At what time the mo
riseth or *setteth*.
IV. The *hour* of the *ni*
by the *shadow* of the M
upon any *Sun-Dial*.

I. To find at what time
Moon will be due Sou
Example Upon the 16t
March, the Moon being t
10 days old, I would know
what time the Moon will
upon the *Meridian* or So
Look in the first Colum
this Table for 10, the M
Age increasing, and right
gainst it in the second C
lumn, you shall find 8 h
0 m. at which time the M
will be just *South* in the e

II. To find how
Moon shineth.
Example, Upon the 4th
March, the Moon that
being 6 days old. I would know how many hours and
she *shineth* that night.

Look for 6 (the *Moons age*) in the first Column of this Table, and right against it (in the third Column) you shall find 12 hours 48 min. and so long will the *Moon shine* that *Evening*, because the Moon increaseth.

III. To find at what time the Moon Riseth and Setteth.

1. If the Moon be increasing, that is, if she be less than 15 days old, *adde* the hours and minutes of her *shining*, to the hours and minutes of the *Suns Rising*, and the sum will be the time of the *Moons Rising*. But,

2. If the Moon be decreasing, that is, if she be above 15 days old, *substract* the hours and minutes of her *shining* from the hours and minutes of the *Suns Rising*, and the remainer will be the time of the *Moons Rising*.

For the Moons Setting.

1. If the Moon be less than 15 days old, *adde* the time of her *shining* to the time of the *Suns setting*, the sum is her *setting* —— But

2. If the Moon be above 15 days old, *substract* her *shining* from the *Suns setting*, the remainer is her *setting*, adding or substracting 12 hours if need be.

To find the hour of the Night by the Moon in a Sun Dial.

Find at what time the Moon comes to the South as before, which known, mark how much the Shadow upon the Dial wants of 12; which take from the time of the Moons coming to the South, the remainder is the hour of the Night. But if the Shadow be past 12, add those hours to the coming to the South, and the Sum is the hour of the Night.

Example, Upon the 6th. of *April*, the Moon being 13 days old, and comes to the South at 10 h. 24 m. and that night I find the Shadow at 9 h. 30 m. which wants 2 h. and half of 12, wherefore take the 2 h. and 30 m. from 10 h. 24 m. and there will remain 7 h. 54 m. for the hour of the night. But if the Shadow had been 2 h. 30 m. after 12, those added to 10 h. 24 m. would make 12 h. 54 m. for the hour of the Night.

The Uſe of the SUN-DIAL.

FOR the ready finding of the Hour of the Day by this *Dial*, you muſt provide a ſtreight Staff or Ruler, which muſt firſt be divided into Ten equal parts, and then each of thoſe into ten other ſmaller parts, ſo will the whole Staff or Ruler be divided into 100 equal parts, which may be numbred by 10, 20, 30, *&c.* to 100: And ſo is it fitted for Uſe.

Now when you would find the Hour, you muſt erect your Staff or Ruler perpendicular, that is, ſet it upright upon ſome plain level ground, floor, or table, and note the place where the end of the ſhadow did fall, and with your Staff meaſure the length of the ſhadow in Staves lengths, and hundred parts of the length, according as it is numbred.

Example, Suppoſe that upon the 16th day of *January* I do erect my Staff perpendicular, and meaſuring the length of the ſhadow thereof, I find it to be exactly 3 times its length, wherefore finding the 16th day at the top of the Month of *January*, I find 3, 0 to ſtand againſt the 16th day, and at the top find XII, which tells me it is then juſt 12 a Clock. ——— *Example* 2. Suppoſe that upon the 6th of *May* I erect my Staff as before, and meaſuring the ſhadow thereof, I find it to be twice the length of the Staff, and 24 parts more; wherefore, I look at the top of the Dial in *May*, for the 6th day, and caſting my eye along that line, towards the right hands I find 2, 24, to ſtand in that Column, at the top of which is VII, V, which tells me it is either 7 of the Clock in the Morning, or 5 in the afternoon. ——— *Example* 3. Upon the 16th of *April*, I find the length of the ſhadow to be once the Staffs length and 30 parts more; I look in *April* for the 16th day in the Sun-Dial, and in the line againſt it for 1, 30, and [illegible] the fifth Column I find 1, 33 (which is the neareſt number neareſt to 1, 30, in the Table) over which there ſtands IX and III, which ſhews that it is almoſt 9 in the morning, or a little after 9 in the afternoon. ——— *Example* 4, Upon the 26th of *June* I find the length of the ſhadow of the Staff to be once the whole length, and 20 parts; if I look for this Number 1, 20, in the Sun-Dial againſt the 26th of *June*, I can find no ſuch Number, but the neareſt to it leſs in that line is 1, 01, over which ſtands IX, III, and the neareſt number to it, greater, is 1, 38, over which ſtands VIII, IV; ſo that you may conclude the hour to be between 8 and 9 in the morning, or between 3 and 4 in the afternoon. A little practice will make all this plain. *Vale & utimus Magiſter.*

The Number of Pounds, Yards, Gross, or the like, to be bought or sold

THis Table will ſerve for many good purpoſes, but it is principally intended for the Chapmans uſe in Buying Selling of any Commodity by the Yard, Ell, Pound, Hundr Gallon, &c. And its uſe is very eaſie; as by

EXAMPLE I.

At 9 d. *the Yard, what will* 70 *yards come to?*

Look for 9 *d.* at the head of the Table, and for 70 in firſt Row or Column of the ſame Table, and againſt 70, under 9 *d.* you ſhall find 2 *l.* 12 *s.* 6 *d.* And ſo much wi Yards at 9 *d.* the Yard come to.

Alſo, *At* 5 d. *the Gallon,* 500 *Gallons will come to* 10 l. 8s.

And ſo of any other Price, or any other Number.

But if you cannot find your juſt Price at the head of the ble, nor your juſt Number on the ſide, you muſt then take it at twice, and adde them together, and the ſum ſhall an your Queſtion.

EXAMPLE II.

At 7 s. *the Dozen of Gloves, what will* 78 *dozen come*

	l.	s.
70 Dozen at 7 *s.* comes to	24	10
8 Dozen at 7 *s.* comes to	2	16
The Sum	27	06

So that 78 Dozen at 7 *s.* the Dozen, come to 27 *l.* 6 *s.*

EXAMPLE III.

At 3 s. 5 d. 3 q. *the Ell, what will* 300 *Ells come to?*

	l.	s.	d.
300 Ells at 3 *s.* comes to	45	0	0
300 Ells at 5 *d.* comes to	6	5	0
300 Ells at 3 *q.* comes to	0	18	9
The Price of 300 Ells	52	3	9

EXAMPLE IV.

At 7 d. *halfpeny the Pound, what will* 92 *Pound come to?*

	l.	s.
90 Pound at 7 *d.* the Pound, comes to	2	12
2 Pound at 7 *d.* the Pound, comes to		
90 Pound at a halfpeny, comes to		
2 Pound at a halfpeny, comes to	0	05
The Price of 92 Pound, at 7 *d.* 2 *q.*	2	17
